ENGINE NUMBER: _____

DATE: _____

INSTALLING A TOGGLE KILL SWITCH IS MANDATORY!

1. Installation of a toggle kill switch is for ignition cutoff.
2. Engine can turn over with the ignition key to build oil pressure before the engine starts. Note it normally takes 6 to 8 seconds. Watch your oil gauge!
3. Not installing a toggle kill switch VOIDS your warranty and can severely damage the engine within seconds of initial startup. This is necessary on performance engines, not on stock engines.
4. If you have an Oil Cooler Stand Alone or Inline Radiator Oil Cooler, it must be replaced with a new one, and you must provide us with a copy of your receipt.
5. If you had a Points Distributor, note that you will now have an electronic ignition, which means you will have to have 12 volts to the coil.

Remember to keep copies for your own records of anything regarding the toggle kill switch and its installation, including receipts of installation parts and/or labor.
(This is in addition to the other receipt copies you will send us.)

NOTE: If a licensed shop installs your engine, we must also have a copy of your invoice for our file.

CUSTOMER (OR AUTHORIZED SHOP TECH) MUST SIGN BELOW AND RETURN THIS PAGE TO PHOENIX ENGINE ALONG WITH THE WARRANTY PACK, TO SHOW YOUR COMMITMENT TO COMPLY WITH THIS REQUIREMENT.
